AI Powered Technical Job Survival & Performance Bootcamp

Getting hired is one challenge - keeping the job is another. Start with the AI landscape itself: the generative assistants everyone is talking about, the agentic tools that can carry out real work, and transcription that turns meetings into action. Then put it all to work - decoding manager assignments, reconciling data, troubleshooting problems, and using AI responsibly to perform with confidence.

Format	Live online - Google Meet
Schedule	3 sessions per week - 3 hours each
Length	12 sessions - 4 weeks
Classes	Live instructor-led - never recordings

Tuition

$1,000 total. Pay in full, or 4 biweekly installments of $250 (same total). Pay in full with code INSIDER35: $650 (35% off - promo codes apply to pay-in-full only). All payments are final - no refunds.

The 12 sessions

1. The AI Landscape: Meet the Generative Assistants
2. Prompting Well & Checking What You Get
3. Agentic AI: When the AI Does the Task
4. Agents at Work: Research, Files & Code
5. Transcription: Meetings That Write Themselves Down
6. AI for Everyday Work & Life
7. Tickets, Acceptance Criteria & Tested Outputs
8. SQL, Excel & Data Reconciliation
9. Errors, Root Causes & Safe Reruns
10. Manager Updates, Priorities & Handoffs
11. AI at Work, Ethically: Approved Tools & Controlled Automation
12. Capstone: Simulated Technical Workweek

Skills you will practice

Generative AI assistants - Agentic AI - Meeting transcription - Applied workplace AI - Ticket decoding - SQL & Excel reconciliation - Root-cause analysis - Manager communication - AI ethics & verification

Prerequisites

This program is not for beginners: you should currently hold, or be actively interviewing for, a technical role (support, data, SAP, QA, operations).

This course includes

- 12 live sessions on Google Meet (3 hours each)
- Practical assignments & workplace simulations
- 1-on-1 mentor reviews of your work
- Student portal with progress tracking
- Verifiable certificate on completion

The job market, in real numbers

Software developers, QA analysts & testers: $134,040 median annual pay - +10% projected job growth, 2025-35.

Source: U.S. Bureau of Labor Statistics, Occupational Outlook Handbook - median annual pay, May 2025; projected growth 2025-35. Figures describe the occupation nationally - not a starting salary or a promise of employment.
